Re Item V

**Reasoned statement with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement**

Reference is made to the following document:

D1: US-A-3 776 805 (HANSEN R,US) 4 December 1973 (1973-12-04)

The document D1 is regarded as being the closest prior art to the subject-matter of claim 1, and shows (the references in parentheses applying to this document):
a laminated glazing comprising polymeric layers bonded together "so that there are no visually detectable bubbles there between" using an adhesive layer (claim 1).

The subject-matter of independent claim 1 differs from this known D1 in that the claimed material of the present application comprises a bubbling-resistant sheet and a functional sheet.

The subject-matter of independent claim 1 is therefore new (Article 33(2) PCT).

The effect of the above mentioned difference is clear from the comparison of the examples with the comparative examples and page 10, line 1-11, namely that the films according to the present application show no observable bubbles of 3 mm or more.

The problem to be solved by the present invention may be regarded as providing a bubbling-resistant laminate sheet in order to have reduced deteriorations in the surfaces.

The subject-matter of independent claim 1 is therefore also inventive (Article 33(3) PCT).

Claims 2-3 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
